

EXPERIENCE

Mar 2025 - Jun 2025	Wellness PRO Incorporated
Web Developer (Internship)	Pasig City, Metro Manila
- Developed and maintained a company website using WordPress with custom plugins and themes (https://wellnessproinc.com) - Collaborated with teams to learn and apply professional web development workflows and gained hands-on experience in agile development - Visual asset creation using Figma for wireframing and Canva for email campaigns and social media marketing - Used Claude (AI) to speed up development - code review, debugging, and documentation - Managed sprints in Asana, aligning design, dev, and QA co-web dev intern to hit deadlines - Led QA and testing - cross-browser checks, bug tracking, and post-launch validation - Implemented technical SEO - schema markup, semantic HTML, and Core Web Vitals optimization	

EDUCATION

Cavite State University - Imus Campus	Sep 2021 - Sep 2025
Bachelor Of Science In Information Technology	Imus City, Cavite
Graduated as Cum Laude	
Ark Technological Institute Education System, Inc.	Jun 2021 - Jun 2025
ICT Focused In Software And Web Development	Lucena City, Quezon
Graduated as With High Honors	

PROJECTS

Online Ordering System With 3D Viewing And Live Order Tracking - Capstone Project	E-Commerce
HTML, CSS, JavaScript, PHP, SSE(Server Sent Events), MySQL, Leaflet.Js	
- Developed a full stack e commerce platform with a user friendly ordering system. - Added a 3D model API for better product visualization and viewing. - Implemented live order tracking with Leaflet.js and Server Sent Events. - Developed the full stack logic for a reliable ordering and checkout process.	
WordPress-Based Online Ordering System	E-Commerce
WordPress, Elementor, WooCommerce, WPForms, WP Fastest Cache, Wordfence, Updraft Plus	
- Developed an online ordering system using WordPress and WooCommerce to streamline company sales. - Designed responsive interfaces with Elementor to ensure a modern and user friendly experience. - Utilized WPForms to build and manage various interactive forms throughout the website. - Implemented Wordfence for security and WP Fastest Cache for enhanced loading speeds.	
CvSU - Imus Campus Library System	Management System
C#, .Net Frameworks, React JS, Tailwind	
- Designed and developed a library management system for Cavite State University – Imus Campus. - Implemented CRUD operations for managing books, borrowers, and transactions. - Developed database functionality using MySQL for efficient storage and retrieval of library records. - Built system features using C# and .NET Framework to streamline library operations and record management.	
RFID Door Lock System Using Arduino Hardware	Security System
C++, HTML, CSS, JavaScript, Arduino, RFID Module, Servo Motor, Breadboard, Jumper Wires, Power Supply	
- Built a functional RFID-based door access system using Arduino to enhance security through contactless authentication. - Programmed logic to validate RFID tags and control a servo motor for locking and unlocking the door. - Demonstrated the practical application of open-source electronics in real-world security solutions.	

SKILLS

Front-End Development:	HTML, CSS (Bootstrap And Tailwind), JavaScript, React.Js, Next.Js
Back-End Development:	PHP, Next.Js, Python, Node.Js, C#, .Net Frameworks, C++, Java
Database Management:	MySQL, Microsoft SQL Server
Version Control:	Git, Github
Other Tools:	Postman, Hostinger, Figma, WordPress, N8n Automation, Claude AI, Webflow, Canva, Xampp, VsCode, Asana, Jira
